485 Visa | Full work rights to August 2027

PROFESSIONAL PROFILE

Cyber Security graduate with High Distinctions in Digital Forensics and Offensive Security, currently completing an ACS-recognised IT Professional Year. Six months of research internship experience in data privacy and security at Macquarie University, plus self-directed lab work in detection and log analysis using Splunk, Elastic and Sysmon, and a ServiceNow ITSM lab covering ITIL incident handling end to end. Microsoft certified in Azure (AZ-900) and Microsoft 365 (MS-900). Backed by three years of high-volume customer-facing work, I communicate technical issues plainly to non-technical users and document my work thoroughly.

TECHNICAL SKILLS

- **Security & Detection (lab-based):** Splunk and SPL, Elastic, Sysmon, Windows Security event logs; MITRE ATT&CK familiarity
- **Service Desk & ITIL (lab-based):** ServiceNow developer instance; incident and service request handling, impact and urgency, escalation, knowledge base authoring
- **Windows & Microsoft 365:** Windows 10/11 and Microsoft 365 support fundamentals; account and access basics
- **Cloud & Microsoft:** Azure (AZ-900) and Microsoft 365 (MS-900) certified
- **Networking (foundational):** TCP/IP, DNS, DHCP, VLANs; Wireshark basics
- **Systems & Scripting:** Python, Pandas, Scikit-learn; Linux (Ubuntu, Debian)
- **Data Privacy:** Privacy-preserving record linkage, Local Differential Privacy, technical documentation

WORK EXPERIENCE

Data Privacy and Security Research Intern

Feb 2025 – Jul 2025

Macquarie University, Faculty of Science and Engineering, Sydney | Hybrid |
github.com/vennfilbert/securelink-project

- Developed a privacy-preserving record linkage pipeline in Python to match 1,000+ records without exposing personal data, using XGBoost with TF-IDF and SVD preprocessing
- Ran 30+ experiments evaluating the trade-off between matching accuracy and privacy protection; achieved a baseline F1 of approximately 0.91 with only around 1.7% reduction when Local Differential Privacy was applied
- Integrated the model into a React dashboard and troubleshoot data processing and model inconsistency issues to ensure reliable results
- Produced technical documentation and presented findings to academic supervisors; awarded Distinction

Customer Service Supervisor

Apr 2024 – Present

Coles Supermarkets, Macquarie Centre, Sydney

- Act as first point of contact for front-end issues across 100–150+ customers per shift; resolve everyday register and self-checkout problems such as restarts and receipt rolls, and escalate hardware or technical faults to IT or management
- Train and onboard 10+ team members on systems, transaction handling, and escalation procedures, explaining processes clearly to non-technical staff
- Reconcile cash and manage daily transactions exceeding \$10,000 with high accuracy under time pressure
- Maintained 95–100% service KPIs across 3+ years; received the Living Service Hero award; promoted from Team Member within approximately 20 months

Customer Service Team Member
Coles Supermarkets, Macquarie Centre, Sydney

Aug 2022 – Mar 2024

- Processed high-volume transactions and resolved customer issues as first point of contact; recognised multiple times as Team Member of the Day

TECHNICAL PROJECTS

Kerberoasting Detection Lab (Splunk)

Jun 2026

Self-directed home lab | github.com/vennfilbert/kerberoasting-detection-lab

- **Tech:** Splunk, SPL (rex, stats), Windows Security event logs (event 4769), MITRE ATT&CK T1558.003
- **Objective:** Detect a Kerberoasting attempt concealed within normal-looking Windows Active Directory log traffic using a SIEM
- **Approach:** Ingested and analysed Windows Security event records, practising log ingestion, SPL searching and field extraction, then corroborated the finding with request-volume analysis
- **Result:** Isolated the attack, built a summary dashboard, and documented the full process in a public GitHub write-up

ServiceNow ITIL Service Desk Lab

Jun 2026 – Jul 2026

Self-directed home lab | github.com/vennfilbert/servicenow-service-desk-lab

- **Tech:** ServiceNow Personal Developer Instance, ITIL incident and service request workflows, knowledge base
- **Objective:** Practise end-to-end L1 service desk handling in a realistic ITSM environment
- **Approach:** Worked seven tickets end to end: logging, categorising, setting impact and urgency, adding work notes, and resolving with proper resolution codes; escalated a VPN incident and a Priority 1 major incident to the correct team
- **Result:** Wrote six knowledge base articles for common L1 tasks and documented the full build with screenshots in a public GitHub repo

EDUCATION

Bachelor of Cyber Security

Jul 2023 – Jul 2025

Macquarie University, Sydney | WAM 76.13

- High Distinctions in Digital Forensics (93) and Offensive Security (88)

Diploma of Information Technology

Jul 2022 – May 2023

Macquarie University, Sydney | WAM 78.75

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900) – Nov 2025
- Microsoft 365 Certified: Fundamentals (MS-900) – Jan 2026
- Responsible Service of Alcohol (RSA), NSW

PROFESSIONAL DEVELOPMENT

IT Professional Year (ACS-recognised, IT Help Desk stream)

Mar 2026 – Present

Performance Education, Sydney

- Coursework in professional communication and workplace writing, meetings and presentations, Australian business culture, and workplace environment and conduct
