EXPERIENCE

Coles Supermarkets Macquarie Centre

Aug. 2022 – Present

Customer Service Supervisor (Promoted from Team Member) – Part-time

Sydney, Australia

- Led front-of-store operations in a high-volume environment, supporting **100–150+ customers per shift** while resolving payment and self-checkout issues and maintaining **95–100% service KPIs**.
- Trained and onboarded **10+ new staff** on POS systems, customer workflows, safety procedures, and data-handling standards, reducing onboarding errors and improving shift efficiency.
- Handled cash reconciliation, incident reporting, and system-based stock checks with **100% accuracy**, coordinating with supervisors to resolve operational issues and ensure policy compliance.

Macquarie University School of Computing

Feb. 2025 – Jul. 2025

Data Privacy & Security Research Intern

Sydney, Australia

- Contributed to a privacy-preserving data linkage project, working with **multiple unstructured text datasets** to support secure record matching workflows.
- Implemented and evaluated differential privacy techniques across **30+ experimental configurations**, analyzing privacy–utility trade-offs.
- Produced technical documentation and summary reports for supervisors, supporting result validation and research decision-making.

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900)

Nov. 2025

Microsoft Certified: Microsoft 365 Fundamentals (MS-900)

Jan. 2026

EDUCATION

Macquarie University

Sydney, Australia

Bachelor of Cyber Security

Jul. 2023 – Jul. 2025

Diploma of Information Technology

Jul. 2022 – May 2023

PROJECTS

Privacy-Preserving Record Linkage Platform | *Python, XGBoost, Local Differential Privacy*

- Designed and built a data processing pipeline to securely match **hundreds to thousands of unstructured text records** across multiple datasets.
- Implemented differential privacy mechanisms and evaluated results across **multiple experimental runs**, producing documented privacy–utility trade-off reports.

SafeUs Mobile Reporting Application | *Flutter, Firebase*

- Developed a mobile application enabling users to submit incident reports with photos and location data via a cloud-backed system.
- Implemented Firebase authentication and cloud storage to support **multi-user access** and secure data submission.

SKILLS & TECHNOLOGIES

Technologies: Microsoft Azure, Microsoft 365 (Outlook, Teams, SharePoint, OneDrive), ServiceNow, Jira, Git, VS Code, Flutter, Firebase

Technical Skills: Incident handling, documentation, escalation processes, user support, basic scripting (Python, SQL), troubleshooting workflows
